Board of Directors

The committed and accomplished executives on the National Association of Manufacturers (NAM) Board of Directors are the driving force behind the success of the NAM's efforts to create a favorable policy climate for manufacturers. The NAM Board comprises more than 200 of the nation's top manufacturing executives, representing large and small companies alike across all industrial sectors. Board members provide national and global perspectives on the impact of federal government action on their companies' ability to grow and prosper. In addition, board members contribute their leadership and expertise to the NAM's policy-development process.
