The EPA's Latest Threat to Economic Growth

The agency's needless new ozone standard could cost Americans $270 billion annually.

By JAY TIMMONS
Aug. 13, 2014 6:58 p.m. ET

In a town famous for inaction, Washington is gearing up to take action on a major policy issue. But there's a hitch: The outcome could be the most expensive regulation in the nation's history, possibly tanking the economy and costing jobs at a time when businesses, manufacturers and families are making a comeback.

Later this year, the Environmental Protection Agency will decide whether it should tighten the air-quality standard for...
