About IOGP

The International Association of Oil & Gas Producers (IOGP) is the voice of the global upstream industry. Our Members operate around the globe, producing more than a third of the world’s oil and gas.

Together, we identify and share knowledge and good practices to improve the industry in areas such as health, safety and the environment.

Standards Committee

- **Chair**: Ian Cummins, BP
Overview

IOGP’s Management Committee is responsible for the Association’s overall strategy and direction. It provides guidance on policy, work plans, finance and communications and it ensures that we keep to our Articles of Association.

The Management Committee consists of nine members (including Chair and Vice Chairs). Of these nine members, one represents a major oil industry service company.

Committees

Our extensive international membership brings with it a wealth of know-how, data and experience. This provides IOGP with extensive technical expertise, organized in a dynamic network of standing committees, subcommittees and task forces (TF). They all report to the Management Committee.

These committees and task forces manage the exchange and dissemination of good practice through publications and events around the world. This work is primarily done by staff of our member organizations, with support from the secretariat.
