G20 CEO Advisory Group members

The ICC G20 CEO Advisory Group is the primary body for establishing the direction of business input within the G20 process. The group determines policy priorities and takes a final review of policy products, including input gathered during the consultative process.

The formation of the ICC G20 CEO Advisory Group was a critical step in the development of constructive policy recommendations. The group provides additional weight to business interventions, strengthens the impact of statements to the media, and conveys to governments that business is actively engaged in the G20 agenda at the highest levels.
