How we're structured

ICCA is governed by a Board of Directors representing member associations and a Steering Committee responsible for oversight of several working level groups. ICCA is a virtual organisation, coordinating the work of individuals from member associations and their member companies. The Board of Directors is led by a President, the private sector CEO who chairs the association currently serving as the ICCA Secretariat. The Secretariat function, which rotates among the major associations, is led by a Council Secretary, who chairs the Steering Committee, and is the head of the association currently serving as Secretariat.
