

Royal Dutch Shell

Detailed assessment of Royal Dutch Shell’s corporate industry association review

April 2021

This document outlines a detailed breakdown of InfluenceMap’s assessment of the company’s corporate disclosure on industry association lobbying, using the traffic-light assessment framework summarized below. Further details on the assessment methodology is available in the Appendix, and in our April 2021 report [here](#).

Key	Explanation
 	Has broadly met investor expectations in this area.
 	Has made some progress on investor expectations in this area, but with significant deficiencies.
 	Has fallen short of investor expectations in this area.

A copy of Royal Dutch Shell’s latest disclosure on industry associations and climate lobbying can be [found here](#). InfluenceMap’s online profile of Royal Dutch Shell, including access to the underlying data which forms this assessment, can be found [here](#).

Item	Comment
Corporate climate positions	Shell has disclosed six detailed climate policy positions in its 2021 review including net-zero emissions and carbon pricing. Shell’s 2020 update also outlined the company’s position on specific climate policies including the EU Green Deal and methane regulation in the EU and US. The 2021 review also includes a clear reference to a list of climate policy positions and examples of Shell’s advocacy on its website.
Industry group climate positions	Shell has disclosed a detailed account of all key industry associations’ climate policy positions under the six key policy areas, including details of their influencing activities. However, this account appears to overlook detailed negative lobbying by a number of industry associations including APPEA.
Alignment assessment method	Shell has disclosed a clear explanation of its alignment assessment methodology, assessed on the six key policy areas. The company has also disclosed a clear and detailed explanation of how the methodology has been applied to each industry association.
Framework for misalignment	Shell’s 2021 review refers to the guiding principles outlined in its 2019 review. These principles outline clear escalating steps to address potential cases of misalignment, stating that Shell will increase engagement, pursue advocacy independently through other coalitions and reassess membership including ending board and committee memberships or leaving the industry association. However, there are no timelines attached to the framework.

<p>Identify & Assess</p>	<p>Shell has identified one case of “material misalignment” with the Queensland Resources Council (QRC). Shell has also identified seven cases of “some misalignment” with American Petroleum Institute (API), Chamber of Minerals and Energy of Western Australia (CMEWA), Electric Power Supply Association, National Association of Manufacturers (NAM), Texas Oil & Gas Association, US Chamber of Commerce (USCC) and Wind Europe. InfluenceMap analysis indicates that Shell likely has eight memberships to industry associations materially misaligned with the Paris Agreement (API, Canadian Association of Petroleum Producers, CMEWA, Oil & Gas UK, NAM, QRC, USCC, Western States Petroleum Association) and thirteen memberships to industry associations potentially misaligned with the Paris Agreement (American Chemistry Council, Australian Industry Greenhouse Network, Ai Group, APPEA, Business Council of Australia, BusinessEurope, European Roundtable of Industrialists, FuelsEurope, International Air Transport Association, International Association of Oil and Gas Producers, Natural Gas Supply Association). InfluenceMap analysis also indicates a further one case of material misalignment (Consumer Energy Alliance) and four cases of potential misalignment (Australian Institute of Petroleum, Australian Pipelines and Gas Association, Eurogas, German Chemical Industry Association (VCI)) with associations excluded from the review.</p>
<p>Monitor & Review</p>	<p>Shell has published full reviews in 2019 and 2021. In April 2020, Shell also published an update on the nine associations with some misalignment found in 2019 including actions taken within each association, key changes to the associations’ climate positions and detailed next steps. Shell has committed to publish its next update in 2022.</p>
<p>Act</p>	<p>Shell has shown evidence of action to address misalignment by terminating its membership to the American Fuel & Petrochemical Manufacturers, and outlining its ongoing engagement with the nine partially aligned associations with reference to specific climate policies. In its 2021 review, Shell also provides a case study of addressing misalignment with the American Petroleum Institute and the US Chamber of Commerce, including actions taken and progress made. However, the company does not appear to have addressed key cases of material and potential misalignment with the Paris Agreement identified by InfluenceMap’s database (see Identify & Assess).</p>

Appendix A: Methodologies for Assessment

Scoring Disclosures and Policy-Alignment

Key	Explanation
	Has broadly met investor expectations in this area.
	Has made some progress on investor expectations in this area, but with significant deficiencies.
	Has fallen short of investor expectations in this area.

Assessing Disclosures

Since BHP's 2017 industry association review, around 20 major global corporates have delivered similar, specific disclosures on their industry association links in response to investor pressure. This positive momentum is undermined, however, if the resulting disclosures are of poor quality.

In its *'Investor Expectations on Corporate Climate Lobbying'* report, the PRI highlights the need for disclosure on the company's positions and activities on climate change policy engagement, as well as the positions and activities of the industry groups it supports. The PRI further requests information on the governance processes and actions taken to ensure alignment between these activities and the company's stated climate goals. *IIGCC* and *Ceres* articulate similar expectations, also requiring companies to disclose a material impact assessment of lobbying by an organization that opposes their public position. InfluenceMap uses the following assessment criteria to test the clarity, accuracy and scope of information provided by companies against four key issues.

Disclosure Item	Score	InfluenceMap's Assessment Criteria
Corporate climate policy positions and influencing activities		The company has disclosed a detailed and clearly referenced breakdown of its own climate policy positions and influencing activities beyond 'top-line' climate statements. This includes descriptions of the company's positions and policy engagement activities on specific items of regulation and legislation which are material to the company's operations, business sector, and/or the region(s) in which it operates.
		The company has disclosed a breakdown of its own climate policy positions and influencing activities. However, the company's description of its positions and policy engagement activities on specific items of regulation and legislation lacks detail, and/or the company has not disclosed its position and engagement activities on key items of regulation and legislation which are material to its operations, business sector, and/or the region(s) in which it operates.

		The company has made no attempt to disclose its climate policy positions and influencing activities, or the company's disclosure is limited to a brief overview of its 'top-line' climate statements and operational commitments without reference to specific items of regulation and legislation.
Industry association climate policy positions and influencing activities		The company has disclosed a detailed and accurate account of the climate policy positions and influencing activities of each industry association actively engaged on climate change policy, including descriptions of positions and policy engagement activities on specific items of regulation and legislation beyond 'top-line' statements.
		The company has disclosed an account of the climate policy positions and influencing activities of each industry association actively engaged on climate change policy, beyond 'top-line' statements. However, the disclosure lacks detail on positions and policy engagement activities on specific items of regulation and legislation, and/or does not disclose evidence of negative climate lobbying by one or more of its industry associations.
		The company has not disclosed the climate policy positions and influencing activities of each industry association actively engaged on climate change policy, and/or the company's disclosure is limited to a brief overview of 'top-line' climate statements without reference to specific items of regulation and legislation.
Alignment assessment method		The company has: (1) disclosed a clear and detailed framework for assessing alignment with its industry associations across all relevant areas of policy engagement; (2) consistently applied this framework across <i>all</i> industry associations; and (3) provided a clear and detailed explanation behind each evaluation.
		The company has disclosed a framework for assessing alignment with its industry associations but the disclosure lacks detail regarding <i>one</i> of the above steps (1-3).
		The company has not disclosed a framework for assessing alignment with industry associations, or it has disclosed a framework but the disclosure lacks detail regarding <i>more than one</i> of the above steps (1-3).
Framework for addressing misalignment		The company has disclosed a clear and detailed framework for addressing misalignments with its industry associations including escalation steps and clear deadlines for industry associations which do not amend misaligned practices.
		The company has disclosed a clear and detailed framework for addressing misalignments with its industry associations including escalation steps, but there is no clear deadlines for industry associations which do not amend misaligned practices
		The company has not disclosed a framework for addressing misalignments with its industry associations, or the company has disclosed a framework but the steps are ambiguous and lack sufficient detail.

Assessing Policy Alignment Process

As well as transparent disclosures on industry group links and lobbying activities, the investor expectations communicated by IIGCC, CERES and the UN PRI also set out the need for robust processes to ensure alignment between the company's stated policy positions and the positions and lobbying activities of their industry groups. These processes consist of the following three elements:

Alignment Process	Score	InfluenceMap's Assessment Criteria
Identify & Assess		The company has identified all cases of misalignment with its industry associations and the Paris Agreement in line with InfluenceMap's <i>database</i> on corporate lobbying.
		The company has not identified key cases of misalignment with the Paris Agreement in line with InfluenceMap's <i>database</i> on corporate lobbying. Companies are scored in this category if they miss up to three cases of "potential" misalignment (industry associations with Organization Scores 34-66 in InfluenceMap's database).
		The company has not identified key cases of misalignment with the Paris Agreement in line with InfluenceMap's <i>database</i> on corporate lobbying. Companies are scored in this category if they miss one case of "material" misalignment (industry associations with Organization Scores 0-33) or more than three cases of "potential" misalignment (industry associations with Organization Scores 34-66 in InfluenceMap's database).
Monitor & Review		The company has published a review of industry associations on an annual basis, has committed to do so at least once a year, or is/has committed to disclose regular updates on its review and alignment process. Updates should accurately report on relevant material and on-going lobbying activities of potentially misaligned industry associations, as well as the company's alignment and engagement with the industry association concerning these activities.
		The company has committed to publish an update to its review of industry associations but not an annual basis or not specified a timeframe.
		The company has not committed to any follow-up processes as part of its review of industry associations.
Act		The company has shown evidence of action to address all cases of misalignment with its industry associations and the Paris Agreement, in line with InfluenceMap's <i>database</i> on corporate lobbying. The investor expectations outlined by <i>PRI</i> , <i>IIGCC</i> and <i>Ceres</i> include several steps companies can take to address misalignment. Steps should include terminating memberships or taking specific action to reform the detailed and material lobbying activities undertaken by misaligned organizations.
		The company has shown some evidence of action to address cases of misalignment with its industry associations and the Paris Agreement, but has not addressed key cases of "material" or "potential" misalignment identified by InfluenceMap's <i>database</i> on corporate lobbying, i.e. industry associations with Organization Scores 0-66 in InfluenceMap's database. The investor expectations outlined by <i>PRI</i> , <i>IIGCC</i> and <i>Ceres</i> include several steps companies can take to address misalignment. Steps should include terminating memberships or taking specific action to reform the detailed and material lobbying activities undertaken by misaligned organizations.
		The company has shown no or limited evidence of action to address cases of misalignment with its industry associations and the Paris Agreement, missing key cases of "material" or "potential" misalignment identified in InfluenceMap's <i>database</i> on corporate lobbying, i.e. industry associations with Organization Scores 0-66. The investor expectations outlined by <i>PRI</i> , <i>IIGCC</i> and <i>Ceres</i> include several steps companies can take to address misalignment. Action will be scored under this category if it does not include terminating memberships or taking specific action to reform the detailed and material lobbying activities undertaken by misaligned organizations.

To assist this assessment, InfluenceMap will be applying its database on corporate and industry group climate change lobbying. This tracks in real-time the detailed climate policy lobbying of around 300 companies and 100 industry associations globally, allowing like-for-like comparisons of organizations' positions on climate policy that are compared to a benchmark of Paris-aligned climate policy. This system can track the evolution of corporate and industry group climate lobbying positions over time.
