

Woodside

Detailed assessment of Woodside’s corporate industry association review

April 2021

This document outlines a detailed breakdown of InfluenceMap’s assessment of the company’s corporate disclosure on industry association lobbying, using the traffic-light assessment framework summarized below. Further details on the assessment methodology is available in the Appendix, and in our April 2021 report [here](#).

Key	Explanation
 	Has broadly met investor expectations in this area.
 	Has made some progress on investor expectations in this area, but with significant deficiencies.
 	Has fallen short of investor expectations in this area.

A copy of Woodside’s latest disclosure on industry associations and climate lobbying can be [found here](#). InfluenceMap’s online profile of Woodside, including access to the underlying data which forms this assessment, can be found [here](#).

Item	Comment
Corporate climate positions	Woodside’s disclosure of its corporate climate position is limited to a statement of three top-line positions (Paris Agreement and net zero by 2050, socio-economic costs of the energy transition, support for low-emissions technology), with limited details on the company’s position on or engagement specific climate policies.
Industry group climate positions	Woodside has disclosed an overview of each industry associations’ climate policy positions and influencing activities. However, it appears to overlook detailed negative lobbying from a number of industry associations including Australian Industry Greenhouse Network and APPEA.
Alignment assessment method	Woodside has disclosed a broad explanation of its alignment assessment methodology based on three climate positions. The company has also disclosed an explanation of how each evaluation has been made, but this disclosure lacks clarity in areas and appears to be disclosed in an ad hoc manner.
Framework for misalignment	Woodside has disclosed several steps to address potential cases of misalignment, including measuring alignment against value of membership, constructive engagement and assessing whether to continue membership. However, no timelines have been attached to the framework.

<p>Identify & Assess</p>	<p>Woodside has not identified any cases of misalignment, but the company has identified “some misalignment” with the Canadian Association of Petroleum Producers (CAPP). InfluenceMap analysis indicates that the company likely has two memberships to industry associations materially misaligned with the Paris Agreement (CAPP, Chamber of Minerals and Energy of Western Australia) and four industry associations potentially misaligned with the Paris Agreement (Australian Industry Greenhouse Network, APPEA, Business Council of Australia, International Association of Oil and Gas Producers). InfluenceMap analysis indicates a further two cases of potential misalignment with industry associations excluded from the review (Australian Institute of Petroleum, Australian Pipelines and Gas Association).</p>
<p>Monitor & Review</p>	<p>Woodside has stated that it will continue to monitor the climate positions of its industry associations, with the Executive Steering Group and Executive Committee conducting biannual and annual reviews respectively. However, the company does not state whether these reviews will be publicly available.</p>
<p>Act</p>	<p>Woodside has shown evidence of action to address misalignment with its industry associations by terminating its membership to the Canadian Association of Petroleum Producers. The company also outlines its ongoing engagement with APPEA and Business Council of Australia. However, the company does not appear to have addressed key cases of material and potential misalignment with the Paris Agreement identified by InfluenceMap’s database (see Identify & Assess).</p>

Appendix A: Methodologies for Assessment

Scoring Disclosures and Policy-Alignment

Key	Explanation
	Has broadly met investor expectations in this area.
	Has made some progress on investor expectations in this area, but with significant deficiencies.
	Has fallen short of investor expectations in this area.

Assessing Disclosures

Since BHP's 2017 industry association review, around 20 major global corporates have delivered similar, specific disclosures on their industry association links in response to investor pressure. This positive momentum is undermined, however, if the resulting disclosures are of poor quality.

In its *'Investor Expectations on Corporate Climate Lobbying'* report, the PRI highlights the need for disclosure on the company's positions and activities on climate change policy engagement, as well as the positions and activities of the industry groups it supports. The PRI further requests information on the governance processes and actions taken to ensure alignment between these activities and the company's stated climate goals. *IIGCC* and *Ceres* articulate similar expectations, also requiring companies to disclose a material impact assessment of lobbying by an organization that opposes their public position. InfluenceMap uses the following assessment criteria to test the clarity, accuracy and scope of information provided by companies against four key issues.

Disclosure Item	Score	InfluenceMap's Assessment Criteria
Corporate climate policy positions and influencing activities		The company has disclosed a detailed and clearly referenced breakdown of its own climate policy positions and influencing activities beyond 'top-line' climate statements. This includes descriptions of the company's positions and policy engagement activities on specific items of regulation and legislation which are material to the company's operations, business sector, and/or the region(s) in which it operates.
		The company has disclosed a breakdown of its own climate policy positions and influencing activities. However, the company's description of its positions and policy engagement activities on specific items of regulation and legislation lacks detail, and/or the company has not disclosed its position and engagement activities on key items of regulation and legislation which are material to its operations, business sector, and/or the region(s) in which it operates.

		The company has made no attempt to disclose its climate policy positions and influencing activities, or the company's disclosure is limited to a brief overview of its 'top-line' climate statements and operational commitments without reference to specific items of regulation and legislation.
Industry association climate policy positions and influencing activities		The company has disclosed a detailed and accurate account of the climate policy positions and influencing activities of each industry association actively engaged on climate change policy, including descriptions of positions and policy engagement activities on specific items of regulation and legislation beyond 'top-line' statements.
		The company has disclosed an account of the climate policy positions and influencing activities of each industry association actively engaged on climate change policy, beyond 'top-line' statements. However, the disclosure lacks detail on positions and policy engagement activities on specific items of regulation and legislation, and/or does not disclose evidence of negative climate lobbying by one or more of its industry associations.
		The company has not disclosed the climate policy positions and influencing activities of each industry association actively engaged on climate change policy, and/or the company's disclosure is limited to a brief overview of 'top-line' climate statements without reference to specific items of regulation and legislation.
Alignment assessment method		The company has: (1) disclosed a clear and detailed framework for assessing alignment with its industry associations across all relevant areas of policy engagement; (2) consistently applied this framework across <i>all</i> industry associations; and (3) provided a clear and detailed explanation behind each evaluation.
		The company has disclosed a framework for assessing alignment with its industry associations but the disclosure lacks detail regarding <i>one</i> of the above steps (1-3).
		The company has not disclosed a framework for assessing alignment with industry associations, or it has disclosed a framework but the disclosure lacks detail regarding <i>more than one</i> of the above steps (1-3).
Framework for addressing misalignment		The company has disclosed a clear and detailed framework for addressing misalignments with its industry associations including escalation steps and clear deadlines for industry associations which do not amend misaligned practices.
		The company has disclosed a clear and detailed framework for addressing misalignments with its industry associations including escalation steps, but there is no clear deadlines for industry associations which do not amend misaligned practices
		The company has not disclosed a framework for addressing misalignments with its industry associations, or the company has disclosed a framework but the steps are ambiguous and lack sufficient detail.

Assessing Policy Alignment Process

As well as transparent disclosures on industry group links and lobbying activities, the investor expectations communicated by IIGCC, CERES and the UN PRI also set out the need for robust processes to ensure alignment between the company's stated policy positions and the positions and lobbying activities of their industry groups. These processes consist of the following three elements:

Alignment Process	Score	InfluenceMap's Assessment Criteria
Identify & Assess		The company has identified all cases of misalignment with its industry associations and the Paris Agreement in line with InfluenceMap's <i>database</i> on corporate lobbying.
		The company has not identified key cases of misalignment with the Paris Agreement in line with InfluenceMap's <i>database</i> on corporate lobbying. Companies are scored in this category if they miss up to three cases of "potential" misalignment (industry associations with Organization Scores 34-66 in InfluenceMap's database).
		The company has not identified key cases of misalignment with the Paris Agreement in line with InfluenceMap's <i>database</i> on corporate lobbying. Companies are scored in this category if they miss one case of "material" misalignment (industry associations with Organization Scores 0-33) or more than three cases of "potential" misalignment (industry associations with Organization Scores 34-66 in InfluenceMap's database).
Monitor & Review		The company has published a review of industry associations on an annual basis, has committed to do so at least once a year, or is/has committed to disclose regular updates on its review and alignment process. Updates should accurately report on relevant material and on-going lobbying activities of potentially misaligned industry associations, as well as the company's alignment and engagement with the industry association concerning these activities.
		The company has committed to publish an update to its review of industry associations but not an annual basis or not specified a timeframe.
		The company has not committed to any follow-up processes as part of its review of industry associations.
Act		The company has shown evidence of action to address all cases of misalignment with its industry associations and the Paris Agreement, in line with InfluenceMap's <i>database</i> on corporate lobbying. The investor expectations outlined by <i>PRI</i> , <i>IIGCC</i> and <i>Ceres</i> include several steps companies can take to address misalignment. Steps should include terminating memberships or taking specific action to reform the detailed and material lobbying activities undertaken by misaligned organizations.
		The company has shown some evidence of action to address cases of misalignment with its industry associations and the Paris Agreement, but has not addressed key cases of "material" or "potential" misalignment identified by InfluenceMap's <i>database</i> on corporate lobbying, i.e. industry associations with Organization Scores 0-66 in InfluenceMap's database. The investor expectations outlined by <i>PRI</i> , <i>IIGCC</i> and <i>Ceres</i> include several steps companies can take to address misalignment. Steps should include terminating memberships or taking specific action to reform the detailed and material lobbying activities undertaken by misaligned organizations.
		The company has shown no or limited evidence of action to address cases of misalignment with its industry associations and the Paris Agreement, missing key cases of "material" or "potential" misalignment identified in InfluenceMap's <i>database</i> on corporate lobbying, i.e. industry associations with Organization Scores 0-66. The investor expectations outlined by <i>PRI</i> , <i>IIGCC</i> and <i>Ceres</i> include several steps companies can take to address misalignment. Action will be scored under this category if it does not include terminating memberships or taking specific action to reform the detailed and material lobbying activities undertaken by misaligned organizations.

To assist this assessment, InfluenceMap will be applying its database on corporate and industry group climate change lobbying. This tracks in real-time the detailed climate policy lobbying of around 300 companies and 100 industry associations globally, allowing like-for-like comparisons of organizations' positions on climate policy that are compared to a benchmark of Paris-aligned climate policy. This system can track the evolution of corporate and industry group climate lobbying positions over time.
